## **Poruka Direktora**

Bosna RE d.d. je poslovanje za 2002. godinu okončala sa dosta dobrim rezultatima. Ostvaren je porast premije reosiguranja, za oko 20% u odnosu na 2001. godinu, ostvarena je dobit iz koje je isplaćena dividenda u visini od 8% i ono što je jošvažnije, iz koje je i dalje nastavljeno povećavanje rezervi sigurnosti. Međutim, svi ovi rezultati su postignuti u stanju okruženja, koje je veoma teško prikazati u nekoliko riječi. U cijelom periodu od 1996. godine stanje u ekonomiji je izuzetno teško. Visoke stope rasta GDP, zasnovane prevašodno na donacijama, od 2000. godine imaju stalnu stagnaciju ili pad. Zemlja je jošuvijek i politički i ekonomski podijeljena na dva, odnosno tri dijela. Jošuvijek nije donesena jedinstvena strategija razvoja Bosne i Hercegovine, a proces privatizacije ne samo da nije donio očekivane efekte, nego je jošviše doprinio otežanju ekonomске i socijalne situacije u zemlji. Sve ovo se itekako odražava na industriju osiguranja, a zatim i reosiguranja. Društva za osiguranje u cjelini nisu ostvarila neke značajne rezultate. Premija osiguranja porasla je za svega 8%, što je ipak bolje nego u 2001. godini, u kojoj nije zabilježen rast. Stoga je porast premije reosiguranja više odraz povećanih potreba za reosiguranjem, zbog malih kapaciteta društava za osiguranje, nego porasta ukupne premije osiguranja. Naravno, dosta jak uticaj na povećanje premije reosiguranja Bosna RE-a, imali su i prihodi ostvareni iz poslova, odnosno ugovora zaključenih sa inozemnim društvima za osiguranje, odnosno reosiguranje.

Svakako, na poslovanje Bosna RE veliki uticaj ima i stanje na međunarodnom tržištu reosiguranja. Daljnja pogoršanja uslova reosiguranja, imat će sve negativiji odraz na rad Bosna RE-a. Relativno slaba snaga domaćeg tržišta osiguranja nije u mogućnosti podnijeti stalne pritiske i zahtjeve za isključenjima, limitima i svim drugim ograničenjima, koji su limitirajući faktor za ionako nerazvijeno tržište.

I pored svega, izuzetnim naporima dosta male, ali dobro educirane ekipe Bosna RE-a, uspijevamo da svake godine bilježimo rast premije, ostvarujemo profit, jačamo rezerve i dobivamo nove klijente. Kao jedini reosiguravač u regiji, koji je potpuno privatizovan i koji nema «matičnu» kuću iza sebe, uspjeli smo da proširimo naše poslovanje i steknemo klijente i u drugima državama regije, tačnije u R. Hrvatskoj i Makedoniji. Naravno, uz to prihvaćamo i poslove sa tržišta centralne, istočne i jugoistočne Europe.

Rezultati poslovanja dati u tabelama ovog izvještaja, nisu spektakularni, ali treba imati u vidu u kakvim su uslovima ostvareni. Jedno potpuno razoren tržište osiguranja polako se uređuje. Nova zakonska regulativa, koja treba da stupi na snagu početkom 2004 godine, potpuno je usaglašena sa EU direktivama. Od stihjskog preuzimanja rizika, postepeno, društva za osiguranje počinju da kontrolišu rizike i da ostvaruju.

Direktor  
Damir Lačević

## **A Word by Director**

Bosna RE ended business year 2002 with fairly good results. An increase of reinsurance premium of 20% in comparison 2001 was achieved; dividend of 8% was paid out from profit and as most important, free reserve was increased from that profit as well. However, all these results were achieved in environment whose condition is hard to explain in just a few words. During entire period as of 1996 situation in economy is very hard. High growth rates of GDP, based mainly on donations, as of year 2000 have a trend of stagnation or fall. Country is still both politically and economically divided into two, or three parts. A unique strategy of development of Bosnia and Herzegovina is still not adopted, while process of privatization not only has not brought desired effects but contributed even more to hardening of economic and social situation in country. This all is certainly reflected on insurance industry as well as on reinsurance. Insurance companies generally speaking have not realized significant results. Insurance premium had a growth of only 8%, which is still better than in 2001 when no growth was recorded. Therefore increase of reinsurance premium is more reflection of increased needs for reinsurance due to low capacities of insurance companies than effect of increased overall insurance premium. Of course, quite strong influence on increase of reinsurance premium of Bosna RE had incomes from reinsurance treaties concluded with foreign insurance and reinsurance companies. Operations of Bosna RE are of course greatly affected by situation on international reinsurance market. Further deterioration of reinsurance terms and conditions will negatively influence work of Bosna RE. Relatively weak strength of local insurance market is not capable to sustain constant pressures and requests for exclusions, limits and other limitations that would constitute an additional obstacle on anyway undeveloped market.

In spite all of that, thanks to extreme efforts of small but well educated team of Bosna RE we manage to maintain growth of premium every year, produce profit, strengthen our reserves and obtain new clients. As the only reinsurer in the region that is fully privatized and without «mother» company behind us, we succeed to widen our operations and gain clients in other countries of the region, namely in Croatia and Macedonia. Of course, beside that we have acceptances from the markets of Central, East and Southeast Europe.

Business results given in the tables within this report are nothing spectacular, but one should bear on mind circumstances under which they are achieved. One completely destroyed insurance market is being slowly consolidated. New legislation, due to be in force as of beginning of 2004 is fully compliant with EU directives. From unselective approach in accepting risks, insurance companies started to control risks and are gaining monitoring and controlling abilities over their portfolios. Significant help in this they receive by Bosna RE.

Direktor  
Damir Lačević
