Uvod Direktora

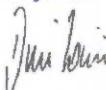

Još jedna poslovna godina je za nama. Bilo je uspješno, ali i veoma teško, na trenutke čak i toliko teško, da se samo po sebi postavlja pitanje, šta se to dešava da ovaj posao, odnosno djelatnost osiguranja i reosiguranja nikako ne može da otpočne sa koliko toliko normalnim radom. A onda se javi i veoma jasan odgovor. Nedostatak volje i želje kod velikog dijela onih koji su u djelatnosti osiguranja, a i onih koji ovu djelatnost prate, da se posvete stvarnom radu za dobrobit prije svega osiguranika, a potom i društava za osiguranje. Potpuno je nejasno da mnogi ne žele ili ne mogu da shvate da loši potezi danas, imaju za posljedicu loše rezultate sutra. Ohrabreni niskom kvotom šteta u vrsti osiguranja autoodgovornosti, koja još uvek čini preko 60% portfelja osiguranja Bosne i Hercegovine, poduzimaju još rizičnije radnje. Ugovorna osiguranja auto-kaska, imovine ili neke druge vrste, preuzimaju se po premijskim stopama, koje sebi ne mogu dozvoliti niti najveći svjetski osiguravači. Konačan ishod ovakvog stanja je veoma spor porast premije osiguranja. Druga karakteristika tržišta osiguranja je veoma mali portfelj osiguranja. Još uvek se niko zvanično ne bavi ovim problemom, ali je potpuno jasno da je od ukupne imovine locirane u Bosni i Hercegovini, osiguran veoma mali dio, a i takva osiguranja nisu uradena na najbolji način, koji bi pružio pravu zaštitu osiguraniku. Naravno, najveći krivac je loša ekonomska situacija i manjak novca, koji se daje prije za sve drugo nego za osiguranje. Stoga i ne čudi da je tokom 2003. godine bilo nekoliko velikih šteta na objektima koji nisu imali nikakvo osiguranje. Doprinos ovakvoj situaciji daju i inozemne kompanije, u slučajevima gdje su one vlasnici imovine u Bosni i Hercegovini. Uobičajeno ovu imovinu osiguravaju u inozemstvu, bez obzira na zakone o osiguranju Federacije BiH i R Srpske. Neki, malo snažniji, da ne bi kršili zakone, traže domaće društvo za osiguranje, koje izdaje fronting policu i za takvu uslugu dobiva neku sitnu proviziju. Svakako, ovo nikako ne doprinosi razvoju bosanskohercegovačkog osiguranja. Nažalost, duga je lista raznih „prekršaja“ i nezakonitih radnji koje čine inozemni osiguravači i brokeri, zaključujući poslove u Bosni i Hercegovini manje-više ilegalno i koji na samu njima poznati način iznose premiju osiguranja iz zemlje. Svakako, ovakvo ponašanje omogućavaju i državni organi, koji nadzoru i kontroli posvećuju veoma malo pažnje.

Ipak, sve stvari i nisu tako crne. I u ovako teškoj ekonomskoj situaciji, bosanskohercegovačko osiguranje postiže određeni rast premije. Naravno to nije mnogo niti ono što se očekuje. Možda je mnogo važnije od rasta premije da se na tržištu profilira nekoliko društava za osiguranje, koja ovom poslu posvećuju punu pažnju i uspostavljaju visoke standarde u pogledu preuzimanja rizika, kontrole portfelja i posvećivanja klijentima. Svakako da ta društva za osiguranje vode dosta računa i o reosiguranju u čemu imaju punu podršku Bosna RE-a. Možda rezultati postignuti u okviru premije reosiguranja ne odražavaju ove pomake, ali svakako, imat će značajan utjecaj u budućnosti.

Smatram da su u 2003. godini postignuti dobri rezultati poslovanja. Povećana je premija reosiguranja za preko 12%. Ostali elementi bilansa pratili su porast ostvarene premije, tako da je dobit nakon oporezivanja, gotovo ista kao i u 2002. godini. Ovdje treba istaći jednu veoma važnu činjenicu. Dividenda za 2003. godinu nije dijeljena. Cjelokupna dobit je iskorištena za povećanje temeljnog kapitala dioničara Bosna RE za 30%.

I na kraju, zahvaljujem svim cedentima, partnerima i dioničarima na ukazanom povjerenju. Njihova vjera u Bosna RE je uvek veoma jak podsticaj za još bolji rad.

A word by Director

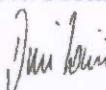

Another business year is behind us. It was successful albeit very hard, in moments so hard to immediately pose a question what was going on to prevent this business and insurance and reinsurance industry from a normal performance. A clear answer follows as well. A lack of will and desire amongst many of those within insurance industry and those who monitor insurance industry to dedicate themselves to a real work, at first to the benefit of the insured and then to the benefit of insurance companies. It is unclear why many do not want or do not comprehend how bad moves of today can produce as a consequence bad results tomorrow. Encouraged by a low loss ratio in motor third party liability that still makes 60% of insurance portfolio of Bosnia and Herzegovina, they are taking even more risky steps. Voluntary classes like motor hull, property or some other classes are underwritten at premium rates that not even the largest world's insurers would apply. Final outcome of such situation is very slow growth of insurance premium. Another characteristic of insurance market is very small insurance portfolio. Still no-one officially deals with this problem but it is completely clear that, out of overall property located in Bosnia and Herzegovina, only a small portion is insured and even such insurances are not done in a proper way to give a true cover for the policyholder. Main to blame is, of course, economic situation and lack of funds as expenditures for anything else are preferred to those for insurance. Thus it was no surprise that several large losses during 2003 were not covered by insurance. The foreign companies that are the owners of the property in Bosnia and Herzegovina also contributed to such situation. They usually insure such property abroad, regardless the provisions of insurance laws in Federation BiH and Republic of Srpska. Some, a bit more resourceful in order not to break the law, look for a domestic insurance company to issue a fronting policy for a small commission. Surely, this does not contribute to the development of the Bosnia-Herzegovina insurance industry. Unfortunately, it is a long list of different violations and non-admitted insurances made by foreign insurers and brokers concluding business in Bosnia and Herzegovina and taking the insurance premium out of the country in an unknown way. Such behavior is certainly enabled by local authorities that pay little attention to supervision.

Still, it is not that black after all. Even in a difficult economic situation, insurance in Bosnia and Herzegovina has a certain premium growth. It is not much and is below expected. Maybe more important than the mere premium growth is presence on the market of several insurance companies being singled out thanks to full attention they give to this business and high standards they establish in risk underwriting, portfolio control and devotion to the clients. Such companies take due care about reinsurance and they have full support from Bosna RE. Maybe results achieved in reinsurance premium do not reflect those movements but definitely they will have significant influence in the future.

I believe that achievement in operation results in 2003 is good. Reinsurance premium was increased for 12%. Other balance elements followed the increase of realized premium so the after tax profit achieved is almost the same as achieved in 2002. Very important fact has to be emphasized here. Dividend for 2003 was not distributed. Entire profit was used for increase of the basic capital of shareholders of Bosna Re for 30%.

At the end, I would thank to all cedants, partners and shareholders on confidence shown to us. Their trust in Bosna RE is always a very strong stimulus for a better performance.
